RECAP OF 11 OCTOBER MEETING

ATTENDANCE: 10

50/50: Barb Barkley

PROGRAM: Program Chair Kris Blair invited Andy Kuhn from Stella Mechanical and energy to present. The theme was "Energy for today - Sustainability for tomorrow". Andy discussed upgrading our systems for the 21st century by using heat pumps. These modern devices lower monthly energy usage, reduce our carbon footprint, increase comfort level, eliminate need for oil and propane and improve indoor air quality. They also install EV charging stations and standby generators. It was very useful information as we look at the prospect of increasing energy bills and the impact of climate change. Andy can be reached at: www.stellaenergy.com
